**Lighting**
The lighting fixtures in ventilators are UL Listed. The amount of light is acceptable with local health codes. Caution: Fire extinguishing system piping installed on the exterior of the ventilator may void the Listings of the ventilator.

**Lighting Requirements**
- A specific light circuit to the ventilator as shown on the electrical plan.
- All ventilators are equipped with hanging brackets.
- UL and ETL Listed exhaust ventilators are tested to standard: INTERTEK TESTING SERVICES. The exhaust ventilator is UL Listed. * The exhaust ventilator meets all requirements of the latest edition of NFPA-96.

**Lighting Compliance References**
- Refer to the wiring diagram for required voltage.
- All ductwork beyond the ventilator duct take-off collar to the exhaust ventilator must be provided and installed by others, in accordance with applicable codes. Exhaust ducts must be continuously welded liquid tight.

**Electrical**
- All electrical conduits shall be pre-installed and pre-wired to a single connection point. Ventilator wiring is not an acceptable receptacle for the installation of the electrical contractor.
- All ductwork beyond the ventilator duct take-off collar to the exhaust ventilator must be provided and installed by others, in accordance with applicable codes. Exhaust ducts must be continuously welded liquid tight.
